Summary

A full stack developer with an experience of more than 4 years, experienced working in react, node and aws. Having expertise in developing highly available, low latency, large scale distributed systems. By taking technical ownership of work I can develop end-to-end (e2e) features and can contribute to solutions design and architectural decisions.

Experience

Senior Typescript Developer

July 2023 - Present

Icontainers | Barcelona, Spain (Remote)

- Designed and implemented a robust data migration mapper from MongoDB to PostgreSQL, ensuring seamless transfer of data from legacy databases.
- Defined and implemented PostgreSQL schemas based on project requirements, ensuring data integrity and adherence to best practices.
- Wrote comprehensive test cases to validate data migration processes, ensuring accuracy, completeness, and reliability of the transferred data.

Tech Stack: typescript, node, javascript, aws, testing, ci/cd

Lead Full React Stack Developer

Jan 2022 - July 2023

Fusion Startup Engineering Studio formally Wearenova | Liverpool, UK (Remote)

- Added smart search functionality to the platform, resulting in enhanced querying by around ten times, leading to excellent results.
- As team lead successfully rolled out the saas platform at nova in hundreds of stores, in the given time frame.
- Along with hands-on development, managed the engineering team, improved the team communication, and did code reviews which increased team skills by 2x.
- Wrote unit tests, refactored old code, and managed CI/CD pipelines in Bamboo, which proliferated the development standards and decreased the margin of errors.

Tech Stack: react, node, aws, mysql, material ui, testing, docker, ci/cd

React Developer

Apr 2021 - Jan 2022

Iplex Pvt Ltd | Islamabad, Pakistan

- Developed applications for tech startups to calculate performance index for investors and founders and included the content needed for Investors and founders to have more insights about the company standing which boosted the engagement by 100%.
- Included the simulator tool to compare deal terms, increasing the visibility by five times.

Tech Stack: typescript, react, firebase, jira, redux, material ui, adobe xd, aws

Assistant Tools Engineer | Full Stack

Sep 2019 - Mar 2021

Huawei | Islamabad, Pakistan

- Worked at Middle East Digital Competence Center (ME- DCC) to develop with Huawei OWS cloud and successfully developed various OWS based platforms, reducing the application development time by ½ hours.
- Deployed dashboards for the Middle East Region, decreasing the monitoring time by up-to 60 minutes.
- Built pipelines using Microsoft TFS removing the manually deployment time of 30 minutes.
- Crafted data analysis and selenium-based automation tools in python, eased workflow time by 10x.

Tech Stack: javascript, es6, react, and vue, graphql

Achievements

- For excellent performance promoted to L5 level at nova, got employee of month award at Huawei in Oct 2020, and a bonus for consecutive three months at Iplex for excellent performance.
- Ranked 3rd at COMSATS university career exhibition and expo on final year project.
- Selected from Pakistan for a summer camp at China Shanghai JiaoTong University(SJTU), where I was awarded a certificate for my excellent performance.

Certifications

- Linkedin React developer assessment
- Huawei L2 python developer

Education

Nano Satellites Design (Summer Camp By APSCO)
Shanghai Jiao Tong University, Minhang Campus | China

Jul 2019 - Aug 2019

BSc Electrical (Electronics) Engineering

Sep 2015 - Jul 2019

Skills

- javascript, typescript, es6
- react.js, next.js, redux
- node.js, nest.js, microservices
- aws
- data structure and algorithms (dsa), design patterns, design principles
- test driven development, jest, enzyme
- solutions design
- architectural decisions
